Education

Jorhat Institute of Science and Technology

Bachelor of Engineering (Electronics and Telecommunication): 71.64%

Jorhat, Assam

September, 2019

Center for Development of Advance Computing

Postgraduate Diploma (Advance Computing)

Bengaluru, Karnataka

March, 2023

Experience

ALSTOM

Application Engineer

Bengaluru, Karnataka

March 2023 – February 2024

- Gather requirements from the customer and prepare the Stakeholder Requirements Specification.
- Perform system requirements analysis and develop the system specification using a requirements management tool (DOORS and DNG)
- Thoroughly understand the requirements and allocate it to proper subsystems.
- Verification and Validation of system and software requirements
- Develop and maintain the compliance matrix
- Ensure bi-directional traceability between customer and system requirements
- Resolve and track problems and changes in tool such as ClearQuest.
- Report progress (Dashboard and KPI) to the management and the customer regularly.
- Participate in project, customer and certification review meetings.
- Escalate issues to the appropriate levels and resolve them without affecting the customer deliverables.

National Informatics Center

Application Developer

Guwahati, Assam

February, 2024 – Present

- Engage with various departments to gather their requirements and elicitate them effectively.
- Decompose gathered requirements into meaningful stories and tasks, ensuring clarity and coherence, using tools such as Jira.
- Monitor and track the development team's progress, ensuring alignment with project milestones and objectives. Distribute detailed progress reports and visual charts to relevant stakeholders, keeping them informed about project status and performance.
- Actively participate in technical meetings and reviews to refine the backlog and sprint planning, ensuring alignment with project goals.
- Compile and present validation and test reports, ensuring thoroughness and accuracy in the assessment of project deliverables.
- Engage in security audits to assess and enhance the project's security posture, contributing to overall risk management efforts.

Certification

- Google Data Analytics – May, 2022
- Atlassian Agile Project Management Professional Certificate – May, 2024
- IBM Engineering Requirements Management DOORS and ELM – June, 2024

Skills & Interests

Technical: Rational DOORS, DNG, DXL, JavaScript, ClearQuest, Jira, Enterprise Architect, Rhapsody

Language: English, Hindi, Assamese

Interests: System Engineering, Requirement Engineering, ASPICE, MBSE, ALM, ELM
